Announcers' Contest

There will be a substantial prize and perhaps a job for the winner of the Announcers Contest which will be running on CFAC in Calgary for the remainder of this month on Monday, Wednesdays and Fridays at 1:30 p.m. On each of these evenings a half hour will be devoted to a program of Announcers, at least something different in the way of Amateur broadcasts. The ladies will have their opportunity too. Entry forms are available at the station studios and a board of competent judges will award the several cash prizes at the end of the series on Friday, July 31st. At the same time CFAC officials will be listening with much interest as some new voices will soon be needed as the station's final campaign of broadcasting gets under way. There's no catch to the offer and the contest will be open to all over 17 years of age. A similar series of discovery two years ago resulted in one of the winners, Chalmers Luckhart, being taken on the permanent staff, while he ranks among the top today. The first heat of the all-contests will be heard over CFAC on Monday July 13th at 6:30 p.m.

Social Credit

Rally and Picnic
Wed., July 15

The Second Annual Social Credit Rally and Picnic will be held in the Marquis Municipal Park, at Lake McGregor, one mile west of Milo, on Wednesday, July 15th, under the auspices of the Majorville, Milo and Queenstown Groups.

A large program of athletic events has been prepared, commencing at 11 a.m. Also a pole-throwing contest and bicycle races. There will be plenty baseball for lovers of this sport, with teams from Arrowwood, Carseland, Lacombe and Queenstown competing for the \$50 in prizes. There will be a ladies' softball game and a horseshoe tournament.

Refreshments will be available on the grounds. Admission to grounds, 15 years and over 25c. Children free.

To wind up the day a big dance will be held in the Community Hall at Queenstown. The music will be supplied by Geo. Robinson and his band.

The committee in charge is working hard to make this celebration bigger and better than last year's and extend an invitation to everyone to come and have a good time.

Ralph Macomber, President.

Chas. A. Northcott Sec'y. Tues.

Mr. and Mrs. W. M. Burris returned on Saturday from a motor trip to Oregon.

Apex Limited, of Calgary call each Wednesday for all kinds of dry cleaning and dyeing. All cleaning left with our agent at the Arrowood Bakery will receive prompt attention. Prices reasonable.

Card of Thanks

We wish to thank all the men who came to our place last Monday and helped when our barn was burning.

Mr. and Mrs. Harry Brown.

Good Minimum

Price Needed

The setting of a fair minimum price for wheat by the Wheat Board is a matter of primary importance to Alberta and Western Canada. The Alberta Wheat Pool invites the co-operation of all organized bodies who are interested in seeing this desire met and brought about. It is also important that the Federal Government be impressed with the need for the continuation of the Wheat Board.

The experience of 1935-36 crop year shows that the setting of a reasonable minimum price provided a measure of protection for the wheat growers that could have been obtained in no other way. The Alberta Wheat Pool contends that the losses, if any, entailed are trivial as compared the advantages gained by providing purchasing power for the farmers of the west. A drive to bring about lower wheat prices was frustrated by the Wheat Pool in co-operation with the Federal Government last year. While the situation has changed somewhat and prospects appear brighter for improved prices this year, it is suggested that the welfare of agriculture needs the steady influence of a substantial minimum price in order to offset adverse movements which may develop later on.

Blackfoot Camp

The Blackfoot Camp of the Young People of the Church of the Brethren are holding their assembly at July 14.

The leaders are Miss Shockley and Mr. Longnecker, of the State of Washington.

The good times experienced in the past will assure another successful camp.

United Church Notes

Sunday, July 12th.
11:45 a.m. Subject: "Mad Dogs and Mosquitoes."

Miscellaneous Shower for Miss Mitchell

On Saturday evening, July 4, a miscellaneous shower was held at the home of Mrs. A. Phillips in honor of Miss Mary Mitchell who is to be married this month.

A color scheme of pink and white was carried out in streamers and garden flowers. The cake was centered with two tiny dolls dressed to suit the occasion and standing before a bank of flowers.

Two very appropriate contests were conducted by Mrs. McBride after which Marjorie Lewendon and Jackie Ward dressed as bride and groom promenaded to the strains of the wedding march played by Mrs. Phillips. Miss Mitchell was then seated in a decorated chair and the gifts were brought forward by the miniature bride and groom.

After the many gifts were opened, sixty-seven guests were served a dainty lunch by the hostess assisted by Mrs. Heschell, Mrs. Riches and Mrs. Mackie.

Nickel and Asbestos

Canada possesses two minerals in greater abundance than any other country in the world—nickel and asbestos.

Both were considered freaks until a commercial use was found for them, says J. C. Lowry, writing in the "C.I.L. Oval."

Of the world's demand for nickel Canada supplies 90 per cent, while of the total production of asbestos, Canada produces some 79 per cent. Asbestos was first discovered by the Romans in the Italian Alps but the only use they could find for it was to make wicks for lamps and shrouds for their dead. Today the automobile industry uses about 55 per cent of the annual production to make brake linings.

BUFFALO HILL NOTES

Mr. J. R. Wyatt was discharged from the Vulcan Hospital. We are pleased to hear that his health has greatly improved.

Mr. Hirst Goldthorpe left last week by truck for Breton. He will return shortly with a load of building material and poles.

The crops in this district are holding up fairly well considering the dry weather. What is needed is a good rain and lots of optimism. We are short on the one, but still have a little of the other.

Collapsible Tubes

Collapsible tubes, in which come such household commodities as toothpaste, commerce in the form of a tin or canister or thicker than two Canadian five cent pieces, says a writer in "The C.I.L. Oval." These are extruded under pressure of from 150 to 900 tons up the sides of a steel rod, thus forming the body of the tube. The tubes are lacquered, printed and polished.

Here and There

What a practical newspaperman finds interesting on a cruise around the world in the Canadian Pacific Liner, "Empress of Canada" can be counted upon to capture the imagination of stay-at-homes. Mrs. E. C. Irwin, a Montreal writer, made a special study of the various places, outstanding persons and strange customs. So he sat down and wrote a book, which is illustrated by photographs he made with his own camera, filled with information of interest to everyone. Now, under the comprehensive title, "—and ships—and seals—", the new book is on Macmillan's fall list.

That United States investors' capital would flow into Canada in an even greater volume is the prediction of the Mutual Life of New York, Inc., in a speech before the Life Underwriters Association of Toronto, at the Royal York Hotel recently.

BASEBALL NOTES

In a closely contested 7 inning game against the Nanton nine the Panthers were defeated by a tune 8-6. Constant hitting coupled with costly errors kept men on bases at nearly all parts of the game for both teams. However Arrowwood had the better of the encounter, and entered the 7th inning leading 6-2. Nanton really went to town in this frame, some members of their lineup taking a second turn at bat, which resulted in six runs crossing the plate.

Arr'd—Pittman p., M. Norton c., Miller 1b., C. Norton 2b., J. Rubblek ss., Vancil 3b., Cary lf., B. Bowbelle cf., Dumka rf., Wilson lf.

Thirteen short European cruises from British ports will be made between May and October by the Canadian Pacific lines. The Orient and the Mediterranean will be covered extensively in these voyages.

Dr. A. H. Compton, physics research expert, recently returned from a trip to Holland on S. S. "Empress of Canada" to study the aurora borealis in the southern hemisphere. A specially constructed bridge on the liner's after-bridge contained the delicate apparatus for the purpose. The author will speak on the little-known but ever present aurora during the ship's Antipodean trip.

"School of Experts," the recently published work by John Murray Gibbon, while really the story of the Canadian Pacific Railway, has as its subtitle, "A history of the railway that will find a permanent place as one of the outstanding contributions to the records of the Dominion. Starting with the first railroads in Canada, a Chinaman, the Hail Stone, in British Columbia at the end of the fifth century, the author traces the remarkable growth of the Canadian Pacific, many centuries later, with a comprehensive history of the author's long association with the railway having been of the world's greatest interest.

Possessing one of the finest collections in the world of colored pictures of scenes in the heart of the Canadian Rockies, the Canadian Pacific, B.C. service, which runs from coast to coast, has a collection of the island, Mayne Island, Vancouver at 2 p.m., July 13, for a seven day trip in the paths of the early explorers.

During the winter season last year, the world was witness to the greatest step forward in skiing travel ever recorded. Over 81,000 skiers, with 50,000 more than last year, made journeys over the weekend from Montreal to the Canadian Rockies. The mountains, the mountain paradise to the north of Montreal thoroughly covered by the Canadian Pacific Railway. Many came from cities in the Eastern United States to enjoy the sport.

Without Fear Or Favor...

"I WILL hew to the line of right, let the chips fly where they may." It takes a stout heart to adopt this principle of General Grant's, yet it is the everyday matter-of-course attitude of a good newspaper. No matter whose head rolls in the dust, the truth must be told. No matter what storms of protest and vituperation it brings about its ears, your newspaper prints the news as and where it is found, faithfully and accurately. No malpractice to the public injury is hidden or condoned; no improper policy goes unchallenged. Because the newspaper is the forum and the voice of public opinion. It is the moving picture of daily life where all see and all judge freely and independently.

"THE truth, the whole truth and nothing but the truth." As I conscientiously act though we're under oath your newspaper gives the plain unvarnished facts. Disagree with the editorials if you will—you have a right to your own opinions, but in the news columns you will find only the news, candid and impartial, on which to base your own judgments.

Tourist Trade Revenue

It would appear that provincial governments of the prairie provinces which neglect to spend sufficient money to maintain their highways in good condition are overlooking a good bet. If figures of tourist traffic from the other side of the international boundary into Canada are an index of what might be expected if highways were made attractive enough to draw tourists from this windfall, which the western provinces might reasonably expect, the results would be most encouraging. In 1935, for example, 1,165,162 tourists from the United States entered Canada, and 1,052,000 of them from the United States, were responsible for a total expenditure of \$302,314,000 in this country during their stay here, if an estimate published by the Dominion department of trade and commerce can be accepted as reasonably accurate.

This is an enormous revenue from such a source when it is remembered that this is the export industry of this agricultural country, totalled in value \$16,152,867 in 1935, and the value placed on Canadian exports of wheat and flour for 1935 by the External Trade branch of the Dominion bureau of statistics.

Then the tourist trade to Canada in 1935 was worth approximately \$46,000,000 more to the country than the principal exported agricultural commodity, and it is to be pointed out that a substantial proportion of tourist expenditure means clear profit, the value of the traffic in comparison is greater than even appears on the surface.

But when one examines the comparative figures of income from tourist traffic by provinces it is immediately apparent that the share derived by the prairie provinces of this new source of wealth is but a drop in the bucket compared to the income enjoyed by some of the eastern provinces and British Columbia from the same source.

For example, figures compiled by the Saskatchewan Motor Club show that on an average expenditure basis, varied according to length of time of their visit, American tourists entering the province direct through ports of entry on the prairie in 1935 totalled an amount of approximately \$822,000 in Saskatchewan, in 1935, to which is added another \$65,670 as the estimated expenditure of those who entered the country through Manitoba and Alberta ports and spent a portion of their time in Saskatchewan, making a total of \$1,474,714 in Saskatchewan's share of this new industry—if it may be called such—last year.

But other words are still needed to describe from this source of new wealth, and less than one cent of the Dominion's total income from tourist traffic. Without going into further detailed figures it may be said that the tourist revenues accruing to Alberta and Manitoba for the same period were relatively commensurate.

There are certain factors responsible for British Columbia and some of the eastern provinces, and particularly Ontario and Quebec, securing the lion's share of the tourist traffic. One of the reasons for this, perhaps, is that these provinces are relatively closer to the larger American centres of population. This is the principal reason. Another is the greater proportion of paved roads on the Canadian side in these provinces directly linked with similar highways in the United States.

But the prairie provinces are also vying for the greater advantages enjoyed by those provinces mentioned, the fact still remains that the prairie provinces are not getting anything like their proper share of tourist traffic and that may well be due to the fact that they have not yet developed the tourist traffic potentialities there are great potentialities yet undeveloped.

The relative scarcity of American tourists in the prairie provinces is due to a heretofore relatively recent development. Visitors found it a long and expensive trip to have to begin their vacation in the prairie provinces. They have been materially improved since that time and the stigma against the prairie roads in those days has by no means been lived down yet. This coupled with the difficulty of financing maintenance of a great mileage of gravelled highways during the still more recent depression years has had the effect of keeping away from the prairie provinces the good many who would have come if the cost of travel had been reduced, and former tourists have returned.

This is a handicap which has to be overcome before the three western provinces can expect to share in full measure the dividends of tourist traffic to which their natural advantages and beauties entitle them. This can only be done by taking the necessary steps to see that the network of highways already built is maintained in good condition and that as far as possible the dust nuisance of the gravelled highways is eliminated or at least mitigated to a minimum coupled with judicious advertising.

Has Modernized Turkey

People Owe Great Deal To President

Of Republic

Mustapha Kemal Ataturk, President of the Turkish Republic since 1923, has had eight attempts on his life in 15 years. He pays a servant £3,000 a year for working 30 minutes a day to taste his food before he eats it—In case of his being poisoned. "Grey Wolf" is his code name for the Turkish State. The Turkish army discredited the fez at his command, and he has altered women's veils, the Turkish calendar, and has thrown overboard and State, established art schools where students work from living models. In Ankara, the capital, there are seven monuments of him. Mustapha Kemal is fond of dancing and goes to parties. He encourages the young folk in enjoying themselves. He is 56 years of age, the son of a minor official, and was educated at the Military College, Turkey.

Belong To Fine Arts

Softball and bridge have been elevated to the "fine arts" by Vancouver's public library. The library's latest report lists a book of official rules of softball and a book on bridge under the fine arts section along with such intricate hobbies as hand-knitting and metalcraft.

Musical instruments used by the Chinese are drums, cymbals, horns, flutes, and gongs and drums. There are three varieties of bells—pe-chung, tschung and plen-chung.

A New Fire Extinguisher

Bomb That Puts Out Blaze Demonstrated in France

There has recently been demonstrated in Paris by its three inventors, Signor Riccardo Signori, Finzi of Italy and Herr Fuschiger of Austria, a bomb that kills fire.

The demonstration was arranged in collaboration with the Strasbourg Fire Brigade, which built some stage equipment for the demonstration.

They also lit petrol and rubber.

The new bombs killed all fire,

and aroused great enthusiasm.

The principle of the new bomb is this: by the force of the explosion it cuts the fire. The chemical substance it contains is quite harmless.

It possesses the property of cooling the material touches, and so it is not liable to damage.

It is also safe to handle from a considerable distance.

He is 56 years of age, the son of a minor official, and was educated at the Military College, Turkey.

New Grade-Testing Station

An experimental station is to be established north of David Thompson, Central Saskatchewan. There are already 25 of these stations in the province for the testing of grain and grasses under different methods of cultivation.

The tons of beeswax used in automobile manufacturing require the labor of \$3,000,000 bees.

People of Germany are drinking more sparkling wine than before the World War.

Toc H Movement

Celebrated Its Coming Of Age At Ceremonies In London

Toc H, a movement which began in a dugout in Poperinghe, on the Ypres road, in 1917, was founded on Sunday, June 28, its coming-of-age in the Crystal Palace, London.

In an address at the ceremony the

"lighting of lamps," the Duke of Kent traced the evolution of the movement, from the simple origin of its humble beginning to the present stage, remarking that Canada now has 38 Toc H units and two houses, South Africa 87 units and one house, and Australia 140 units and one branch.

He read a message from the King

conveying his sincere greetings and congratulations and recalling that from the earliest years of the movement he had presided practically every year at the lighting of the lamps of maintenance.

(The objects of the Toc H movement are to "perpetuate the lessons of cheerful self-sacrifice and self-sacrifice, to help the weak and the crippled, to help the young man who has lost his lives during the Great War." The symbolism of the lamp represents the keeping alive of "the ideals which they embodied").

Prince Edward, Duke of Kent, founder of the movement—to the eastern Mediterranean, the duke said it had stimulated Toc H in that

part of the world, where many of its members are drawn from the army, navy and air force.

British Broadcasting

Government Extends Charter Of The B.R.C. For Ten Years

Following the recommendation of a special committee on broadcasting, the government in London has decided to extend the charter of the British Broadcasting Corporation for 10 years from Dec. 31, next, increase the number of governors from seven to 10 and increase the corporation's share of revenue from the BBC.

Cost of such licences will remain at 10 shillings.

The government held the view the corporation should continue to remain from commercial interests and that the BBC should be the sole authority to conduct its broadcast services.

It approved the suggestion of the committee—last March—that the broadcast service should be decentralized.

It also held that the licensing of relay stations should be continued for another three years, the postmaster-general being empowered to take over the relay stations afterwards.

The government also approved the continued exclusion of advertisements and believed the responsible departments should take all possible steps to prevent the broadcasting of foreign advertisement programs.

After the review, the committee rejected the proposal of the broadcasting committee, which was headed by Lord Illsley, that the cultural side of broadcasting should be transferred to a cabinet minister.

Belgian Defense Project

Plan Erection Of Network Of Machine Gun Nests Along Border

A plan for a series of machine gun nests along the Belgian frontier and extension of the term of Belgian military service is the suggestion of Finzi of Italy and Herr Fuschiger of Austria, a bomb that kills fire.

The demonstration was arranged in collaboration with the Strasbourg Fire Brigade, which built some stage equipment for the demonstration.

They also lit petrol and rubber.

The new bombs killed all fire,

and aroused great enthusiasm.

The principle of the new bomb is this: by the force of the explosion it cuts the fire. The chemical substance it contains is quite harmless.

It possesses the property of

cooling the material touches, and so it is not liable to damage.

It is also safe to handle from a considerable distance.

He is 56 years of age, the son of a minor official, and was educated at the Military College, Turkey.

Violent Deaths

Automobile Accidents, Suicides And Other Mishaps Take Heavy Toll

Automobile accidents and suicides brought death to 6,885 people in Canada last year, the Dominion Bureau of Statistics reported. Almost all forms of violent death, except suicide, showed increases over 1934, and crept up toward record high levels registered around 1930 and 1931.

Automobile mishaps took 1,224 lives or 11.2 per 100,000 of population.

1,131 lives in 1934.

This was the largest toll since 1931, when 1,316 fatalities occurred.

In all, 6,885 persons or 62.9 per 100,000 died from external violence in 1935. This, too, was the highest rate since 1930, and compared with 6,469 in 1934.

Suicides accounted for 902 deaths, compared to 927 in 1934 and homicides for 153 compared with 134 in 1934.

Provinces with the exception of Prince Edward Island, New Brunswick and Alberta showed a larger number of motor vehicle fatalities in 1935 than in the preceding year. Prince Edward Island, however, had two deaths as compared with five, Prince Albert 40 against 52, and Alberta 45 against 41.

Prince Edward Island had the lowest rate, 2.2 per 100,000 and Saskatchewan stood next with a rate of 4.1.

SELECTED RECIPES

MARSHMALLOW CHOCOLATE LOAF CAKE

3 squares unsweetened chocolate
cup cold milk
2 cups flour
2 teaspoons Magic Baking Powder
1/4 teaspoon salt
cup butter
1/4 cup sugar
8 eggs (yolks only)
1/2 cup marshmallows

In a double boiler put chocolate and milk, when melted stir until quite smooth—cool. Sift flour once, measure, add baking powder and salt together then add. Cream butter, gradually add sugar and beat until light and fluffy. Add yolk which have been beaten until thick and lemon colored, and vanilla, then add marshmallows, alternately with the cooled chocolate. Mix well, then beat the mixture until smooth. Bake in a well greased pan in oven (235 degrees F.) for 25 minutes, increase heat slightly to 250 degrees F. and bake 45 minutes. Turn out carefully while still warm, cover bottom with marshmallows which have been rinsed off with cold water and cut in halves cross-wise. When cool cover with chocolate frosting.

Invisible Light

Will Be Given By Lamps In Near Future

In the future lamps will give "invisibles" light. This forecast has been made by J. N. Waite, general manager of the Hull (England) Corporation Electrical Department.

"Lamps will be able to give out light without heat, but what we call invisible light," he said. "Scientist are still striving for increased beauty as well as increased efficiency."

India Has Odd Bridge

A bridge across the Jhelum River in Kashmir is made of wickerwork. It consists of three ropes made of hazel twigs, one to walk on and the others to hold, the ropes being kept in position by V-shaped branches every six feet. The bridge is a narrow affair, about 18 inches wide, and is built of stones.

The defence project, which has been approved by the superior decision council, calls for erection of a network of small machine gun nests.

They will be manned by trained troops and would be reinforced by a "destruction" system under the Maglaine plan.

The system of destruction would consist of mining bridges, roads and railways throughout the border regions to delay the advance of any invading troops.

In advocating the increase in the term of obligatory service, Gen. Maglaine said the measure would provide the nation with a sufficient number of trained troops to carry out his defense plan.

The piranha, a fresh water fish, is found only in the Amazon river and its tributaries. Resembling a whale, it often weighs as much as 200 pounds.

The famous mineral springs of Bath, England, produce 500,000 gallons of medicated water daily.

Popping the Question!

Why don't you, too, get back to Ogden's Fine Cut? Times are better, and Ogden's is a better tobacco—the "one and only" choice of smokers who know that cigarettes rolled with Ogden's are the next best to "tailor-mades". Get yourself a package today—it's Cellophane-wrapped and has the purple easy-opening device. And make sure you use the best cigarette papers—"Chantecler" or "Vogue".

Lives In Lonely District

Woman Has Gold-Trading Post In British Guiana

The Shetland Islands consist of 100 islands, 27 of which are inhabited. The largest are: Mainland, Yell, Unst, Fair, Bressay and Whalsay.

There are no roads to more than 500 feet above sea level. Much of the soil is peaty and only one-sixth is under cultivation. Cattle and sheep are grazed and the small, sturdy Shetland ponies and Shetland cattle are the chief occupations and the whale industry is of importance.

Originally settled by Norsemen of Norway.

Mrs. Violet McTurk, who has lived in the islands since she married "Mick" McTurk, said her husband

had never agreed to trade with men, but she was all right. They had never been a white woman until "Mick" took me back to the post, 200 miles inland from Demerara.

—With Mick did you ever go to the beach or even swim in the sea? "Fins" said.

Mrs. McTurk said she had a

small boat, used as a guide for tourists, and the rest of the time

she conducted her store at the post,

where, she said, she sold everything

from rum to ammunition. On

her first visit to this country, she said she would visit Boston and New York. She was born in Barbados.

Utah's Great Salt Lake

Because there's so much salt in Utah's Great Salt Lake, you can't drink or even swim in it.

But it's still possible for an inexperienced swimmer to drown in the lake by going beyond his depth, losing his balance and being suffocated by the brine. But even then his body would float on the surface.

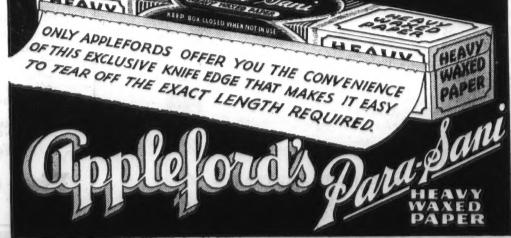

Statistics reveal that for every

three men aged between 75 and 80,

there are four women. For every

four men more than 85, there are

seven women.

ITEMS

A meeting of the Maple Leaf Club will be held on July 22nd.

Miss Marion Coleman visited in Arrowwood with her parents on Saturday and Sunday.

Grace and Freda Board are visiting for a few days at the home of Mrs. M. McNeely.

Miss Verna Ingraham, who has been ill in the Holy Cross Hospital, is recovering very satisfactorily.

Many Arrowwood district people are either attending the Stampede or holidaying during this hot weather.

Mr. R. F. Williams and family returned last week from Banff where the children attended school for the past year.

We are glad to report that Mr. R. G. Bell is improving favorably after his sudden illness of a week ago.

Mr. and Mrs. Benjamin, of Vulcan, were Sunday visitors with Mr. Benjamin's sister, Mrs. C. G. Taylor.

Mr. H. McCullough of the Arrowwood school staff left last Friday for his home in Aldersyde where he will spend the holidays.

Mr. and Mrs. Walter Ward and family and Raymond Wendon left last Saturday for lease near Bassano, where Mr. Ward is rounding up his cattle and branding them.

Miss Patricia Coleman returned on Monday from Milo where she had been visiting for a few days with friends. She was accompanied by Miss Betty Thornton who will spend a short holiday here.

After nine years of service on the staff of the Bank of Nova Scotia, Arrowwood, Miss Mary Mitchell has left the bank service owing to her approaching marriage. Mary will be greatly missed in the bank by her business associates.

Mrs. Young and Mr. and Mrs. Wall and daughter, of California, arrived in Arrowwood last week to visit Mrs. Young's brother, Mr. R. G. Bell. Mr. and Mrs. Wall continued on a trip to the mountains later in the week.

What will probably be the last baseball tournament this year will be held at the Social Credit Rally and Picnic to be held at Lake McGregor on Wed., July 15th. The Arrowwood, Carseland, Lacombe and Queenstown clubs taking part.

Minimum Wheat Price

The Alberta Wheat Pool invites the co-operation of all organized bodies and all interested individuals in impressing upon the Federal Government and the people of all Canada the importance of fixing a minimum price for wheat above the average cost of production.

This can best be done by resolutions passed by boards of trade, municipal councils and other similar organizations, or letters to members of parliament.

WE KNOW WHAT
YOUR FORD NEEDS

Your Ford needs one of our FREE Specialized Spring Checks. Without charge or obligation, we will step down your general service, repair and maintenance, check your radiator, check your hose connections, battery and engine and suggest any necessary adjustments.

If you decide to have any repair or tune-up work done, we will do it at Special Spring Rates. And remember, our mechanics are Ford Specialists, trained by Ford Factory Service Representatives. We work with precision-built Ford Factory-Approved Service Equipment and Genuine Ford Parts. Practical experience has made us thoroughly familiar with Ford engines. It will pay you to let us look after your Ford!
